

THE SHRUNK OAK COLLECTION

SHRUNK Oak Collection is one-of-a-kind. SHRUNK oak floors show an untouched surface with natural surface undulations and some random marks of a band saw. This unique surface is created through a special way of drying or 'shrinking' directly after the freshly oak raw material is sawn at the mill. The subtle aged look has a very organic touch. It feels soft and cozy and is characterized by beautifully brushed 3D knots and cracks and some occasional end splits.

The SHRUNK OAK Collection is made up of 12 finishes and can be specified in plank, herringbone, chevron, and some other decorative patterns and panels, with a bevel on all sides.

SHRUNK panels have a bevel around the outside of the panel only. All patterns have one tongue and groove; For the panels loose tongues are supplied. SHRUNK oak can also be ordered brushed & unfinished, ready for finishing. The high amount of wood tannins makes SHRUNK oak very suitable for smoking and reactive coloring treatments.

DESIGN YOUR OWN SHRUNK OAK FLOOR

choose your pattern & dimension and pick one of our 12 shrunk finishes
