

THE CREATIVE COLLECTION

The CREATIVE Collection allows you to design your own custom geometrical wood floor. It consists of 4 different elements in fixed lengths. Each length represents a multitude of the width of the board. A pre-defined number of each element is assembled into one packing unit, which is illustrated below.

In order to emphasize the pattern, each element is given a square bevel of 1 mm wide and 2 mm deep on all sides. When the elements are laid together, the square bevel measure 2 x 2 mm. All elements have one tongue and three grooves; loose tongues are supplied.
