BEVEL OPTIONS

Unlike many other mass-oriented flooring producers with a narrow assortment and fully automatized production, all our floors are made-to-order with attention to detail. This allows us to customize any aspect of our floor, also see on our [website](#).

We offer the following bevel options:

If not agreed otherwise, all our products in widths up to 140 mm are profiled with tiny bevels. All products from 180 mm and wider come with micro bevels. We recommend sanding products with square edges after installation.
